

## **UNIVERSITY OF NIŠ**

Course Unit Descriptor	Faculty		Faculty of Sport and Physical Education		
GENERAL INFORMATION					
Study program		Basic Academic Studies, Physical Education and Sport			
Study Module (if applicable)					
Course title		Biomechanics			
Level of study		Bachelor academic Daster's Doctoral			
Type of course		⊠ Obligatory□ Elective			
Semester		⊠ Autumn □ Spring			
Year of study		Second			
Number of ECTS allocated		6			
Name of lecturer/lecturers		Ratko Stanković, Ph.D, full professor; Saša Bubanj, Ph.D,full professor			
Teaching mode		<ul> <li>☑ Lectures</li> <li>☑ Group tutorials</li> <li>□ Individual tutorials</li> <li>□ Laboratory work</li> <li>□ Project work</li> <li>□ Seminar</li> <li>□ Distance learning</li> <li>□ Blended learning</li> <li>☑ Other</li> </ul>			
PURPOSE AND OVERVIEW (max. 5 sentences)					
Students are enabled to understand basic functioning of the locomotor system by applying functional anatomy in the area of human movements.					
SYLLABUS (brief outline and summary of topics, max. 10 sentences)					

Theory: The concept and importance of the subject, The development of "the science of motion." Biomechanical principles and methods of research; joints. Kind of motion in the joints. Mechanical properties of joints; bones in the musculoskeletal system. Mechanical properties of bone, Fiber types, Types of muscle, Functional characteristics of muscle. Physiological characteristics of smooth muscle; shape and type of muscular contraction, Muscle work, Torque, Muscle fatigue; muscle force as a vector. Classification of force systems, Linear system power, Parallel forces in a plane. Resultant of: determining the center of gravity of the body, Stacking forces, Decomposition of the force. The overall general system power; Kinematics locomotion, Kinematic methods of research, Basic kinematic scheme of complex movements. General classification of complex movements, Straight, curved and central movement, Oscillation, The dynamics of locomotion. Practicals: Practical teaching follows the theoretical classes. Goniometry - Software MAT, VII; Kinematics - Software and VIDEO TO HUMAN; Densitometry - studying densitometer SAHARA; Dynamometer - Dating Software FORCE STATIC.

LANGUAGE OF INSTRUCTION						
⊠Serbian (complete course) ⊠ English course)		(complete course) ⊠ Other <u>Fre</u>	ench and Spanish (complete			
□Serbian with English ment	oring Serbian	with other mentoring				
ASSESSMENT METHODS AND CRITERIA						
Pre exam duties	Points	Final exam	points			
Theory	10	Final examination	30			
Colloquium 1	25					
Colloquium 2	25					
Seminar paper	10	OVERALL SUM	100			
*Final examination mark is formed in accordance with the Institutional documents
